*The journal is covered in the Emerging Sources Citation Index (ESCI) Clarivate Analytics services.*

(Contents continued on inside back cover)
The publication of the Vol. 49, No 4 of this Journal was fully financially supported by the Ministry of Education and Science of the Republic of Serbia. This support is gratefully acknowledged.

Printed by: "PLANETA print", Ruzveltova 10, 11000 Belgrade

Aims and Scope:
The journal FME Transactions publishes original papers (reviewing and contributed papers, and short communications) from all fields of Mechanical Engineering, which is, as a branch of Engineering, considered in the journal in its broadest possible sense. Thus, the articles are welcome from: Applied Mechanics, Fluids Engineering, Thermodynamics, Heat and Mass Transfer, Robotics, Material Science, Tribology, Combustion, Mechanical Design and Machine Dynamics, Production, Industrial, Agricultural, Aerospace, Processing, Railway, Biomedical and Control Engineering, Mechanization, Hydro- and Thermo-power Systems, Internal Combustion Engines and Vehicle Dynamics, Energy Resources Technology, Military Technology, Naval Architecture, and Applied and Industrial Mathematics.

Theoretical, experimental and computational analyses of various problems of Mechanical Engineering are equally welcome and acceptable for publication. In addition, there will be published book reviews, announcements of symposia, and in special issues, proceedings of selected papers from symposia organized by the Faculty of Mechanical Engineering in Belgrade.

Reviewing papers will be published by invitation only. One volume consists of four numbers.

Instructions for Authors:
A FME Transaction manuscript should by written clearly and concisely in correct English, with assumptions clearly identified, with precise logic, with relevance to practice described, and with actual accomplishments of the work plainly stated and honestly appraised.

Normally, the length of a reviewing paper is up to 12 pages, the length of a contributed paper is up to 8 pages, while the length of a short communication should not exceed 4 pages. All papers are subject to a reviewing process. During the process the names of referees will be kept confidential to authors, and also the names of authors will remain anonymous to referees. As a rule the reviewing process should be accomplished in 2-3 months. Final acceptance of a paper for publication in the Journal is based on the decision of the Editorial Board.

Submission of Papers:

Papers intended for publication in FME Transactions should be submitted to the Editor, in the electronic form, to the following address:

fme-transactions@mas.bg.ac.rs

or:
Prof. Bosko Rasuo, Editor
brasuo@mas.bg.ac.rs
Faculty of Mechanical Engineering
Kraljice Maricje 16,

Volume 49, No 4, 2021, pp. 769 – 1054

CONTENTS CONTINUED

PAGE

Accuracy of Wind Speed Predictability with Heights using Recurrent Neural Networks
M. Mohandes, S. Rehman, H. Nuha, M.S. Islam, F.H. Schulze
908

Reduced Order Modelling and Balancing Control of Bicycle Robot
Santosh Kumar Suman, Awadhesh Kumar
919

Computational Analysis of Convective Heat Transfer Across a Vertical Tube
Jashanpreet Singh, Chappreet Singh
932

Application of the Contour Method to Determine Axial Residual Stresses in Cold Extruded Steel Rods
O. Aydin, C. Simsir
941

An Experimental Study on Hole Quality and Different Delamination Approaches in the Drilling of CARALL, a New FML Composite
Ergün Ekici, Ali Riza Motorcu, Ensar Yıldırım
950

Experimental Study on Vibration Transmissibility of Pre-loaded XPE and PE Packaging Cushioning Material
Younes A. Djemaoure, Branimir B. Krsitić, Boško P. Rašu, Stefan P. Rašić, Daniel R. Radulović, Marjan D. Dodić
962

Numerical Investigation of Dynamic Response of Honeycomb Sandwich Panels Filled with Circular Tubes Under Low Velocity Impact in the In-Plane Direction
Fawaz F. Al-Bakri, Hasan H. Ali, Salwan Obaid Waheed Kafaji
977

A New Analytical Control Strategy for a Magnetic Suspension System under Initial Position Dispersions
Jeng-Haur Horng, Dipto Biswas, Adhitya, Qumrul Ahsan
988

Investigation of Running-in Process Based on Surface Roughness Parameters, Real Contact Area Ratio and Tribological Properties
I. Patirnac, R. G. Ripeanu, I. N. Ramadan
997

Theoretical and Experimental Studies on the Cut Zone Generated by AWJ Process
1005

Improving the Design of Nozzles Used in Zamak High-Pressure Die-Casting Process
Ahmed Elhefnawy, Ali Elmaihy, Ahmed Elweteedy
1014

A University Small Satellite Thermal Control Modeling and Analysis in the Post-Mission Phase
Vo Duy Cong
1025

Industrial Robot Arm Controller Based on Programmable System-on-Chip Device
Khaled Hacini, Ali Benatallah, Abdelkader Harrouz, Djamal Belatrache
1035

Efficiency Assessment of an Earth-Air Heat Exchanger System for Passive Cooling in Three Different Regions - the Algerian Case
Slobodan Ž. Mišić, Marija V. Backović
1047

Constructive Geometric Generating of Concave Pyramids of Fourth Sort
